

EnerStream Agency Services offers complete account management and marketing services, as well as customized, innovative products tailored to meet your company's needs. Our highly skilled and experienced staff is dedicated to providing expert and professional energy management services to end use consumers across Canada.

With over 20 years of combined operations management experience, EnerStream has become an industry leader in transportation management and optimization. Our understanding of pipelines and utilities throughout Canada allows us to efficiently manage your natural gas portfolio while you focus on your core business.

Our risk management capabilities and outstanding market analysis provide you with tremendous flexibility to help manage your gas consumption costs and maximize your bottom line. As a major aggregator of Canadian consumers, EnerStream's market knowledge and economies of scale translate directly into value for our customers.
